wires were carrying 2,500 voits Tuesday night.

It was a part of Hill's duty, in addition to keeping up fires in the plant, to feed a horse in an adjoining stable every morning at 3 o'clock. He usually went from the boller-room to the stable, and as he did so would turn on the lights at a switch beside the door. The button was charged yesterday morning when he touched!

Neely says that there was a heavy current Tuesday night, due to a "ground" or cross-wire somewhere, and that when he departed he warned Hill to be cautious and also told him to call him if it was necessary to do anything with the machinery.
